

Task Procedures

Procedure No. 467

Waste Removal – Garbage and Recycling

Purpose: *This procedure outlines the required process for **the removal of waste materials specifically garbage and recycling.***

Assemble the following equipment:

- Rubber gloves
- Garbage **and/or recycling container**
- **Appropriate** plastic liners

1. Prepare equipment

Put on rubber gloves, remove the plastic liner containing the garbage **or recycling** from the **container**. Tie off **the liner(s)** and **place** into the **appropriate** dumpster(s).

2. Re-line garbage or recycling containers

Place a new plastic liner into garbage **or recycling container**.

Safety and Cleaning tips:

- Reduce load size by removing heavy items.
- Do not empty the **containers** directly into the dumpsters.
- **Ensure all waste materials are in the appropriate liner.**
